SUMMARY	Physicist, optical scientist & data scientist with a passion for community building/engagement, outreach, and teaching: I have over ten years of experience designing, building, and running advanced optical systems, analyzing (microscopy) data, and developing (image) acquisition & analysis workflows. Furthermore, I have been highly engaged in community building/engagement, outreach, and teaching activities focusing on community service, women/diversity in science, open science, and optics/microscopy for more than 15 years.	
RESEARCH INTERESTS	<ul style="list-style-type: none"> • Optics and photonics, particularly involving imaging, microscopy, and optical metrology • Instrument design, development, and application across a wide range of applications (from the life sciences to the physical sciences) • Development of image and data processing and analysis tools • Machine learning and its application in (microscopic) image and data analysis • Statistical methods for large datasets • Open software and hardware tools for imaging, microscopy, and optical metrology 	
POSITIONS	<p>Optical Scientist & Project Team Lead Corporate Research & Technology, Carl Zeiss AG, Oberkochen, Germany</p> <ul style="list-style-type: none"> • Project team lead of a development team within the Corporate Research & Technology (CRT) section at Carl Zeiss AG, working on new tools for imaging, microscopy, & optical metrology • Review and unlock the latest optical trends in imaging, microscopy, & optical metrology • Strong collaboration with internal and external partners • Design and construction of early optical demonstrators/prototypes and their respective control and analysis schemes <p>Research Specialist Janelia Research Campus, Ashburn, VA, USA</p> <ul style="list-style-type: none"> • Design, construction, modification, and troubleshooting of advanced optical systems (iPALM, Lattice Light Sheet Microscope, SiMView Light Sheet Microscope, Aberration Corrected Multifocal Microscope, MOSAIC, FIB-SEM, cryo-SIM, etc.) • Support of (inter)national scientists with their imaging experiments via technical consultations and during their data acquisition at the instruments of Janelia's Advanced Imaging Center (AIC) and Janelia's Light Microscopy Core, and at various other imaging modalities on campus • Troubleshooting of sample preparation • Development and implementation of new image and data analysis strategies for Janelians and users from around the world • Review of proposal drafts and proposals submitted to the Advanced Imaging Center • Design and realization of microscopy and data analysis workshops, symposia, and conferences <p>Postdoctoral Research Fellow National Institutes of Health, National Cancer Institute, Bethesda, MD, USA</p> <ul style="list-style-type: none"> • Design and construction of a microscope for live-cell 5-color single-molecule transcription imaging in eukaryotic cells at high resolution in time and space to capture promoter-enhancer interactions • Development of advanced fluorescence labeling strategies for the genome based on dCas9 (CAS-FISH) • Computational modeling and data analysis of 4D genome data 	<p>2022 - present</p> <p>2019 - 2021</p> <p>2017 - 2018</p>

	Ph.D. Student	2010 - 2016
	Max Planck Institute for Biophysical Chemistry, Göttingen, Germany Department of NanoBiophotonics (Prof. Dr. Stefan W. Hell) <i>Dissertation title:</i> "4Pi-RESOLFT nanoscopy" <i>Advisor:</i> Prof. Dr. Stefan W. Hell	
	<ul style="list-style-type: none"> • Running of various imaging experiments (samples: block copolymers, synaptic vesicles) on an isoSTED microscope • Design and construction of a two-color STED microscope • Design and construction of a 4Pi-RESOLFT nanoscope, including optical and acquisition system. • Development of acquisition software • System/sample testing and optimization 	
	Master Student	2009
	Max Planck Institute of Biochemistry, Martinsried/Munich, Germany Department of Molecular Structural Biology (Prof. Dr. Wolfgang Baumeister) <i>Dissertation title:</i> "Correlative microscopy at liquid nitrogen temperature" <i>Advisors:</i> Dr. Jürgen M. Plitzko, Prof. Dr. Wolfgang Baumeister	
	<ul style="list-style-type: none"> • Development and testing of a cryo transfer shuttle (CryoStage²) for the transfer of amorphous frozen-hydrated samples from a fluorescence to an electron microscope for correlative microscopy • Further development and testing of the software based on scale-invariant feature transform (SIFT) for the correlative microscopy approach 	
	Undergraduate Researcher - various research assistant positions	2005 - 2008
	<ul style="list-style-type: none"> • Evaluation of the mechanical properties of actin filaments in combination with different actin-binding proteins at the Physics Department of the Technical University of Munich, Germany - Prof Andreas Bausch (2008) • Study of HEK cells with FLIC-microscopy at the Max Planck Institute of Biochemistry, Martinsried, Germany - Prof Peter Fromherz (2008) • Analysis of Multi-SANS data (with MIRA) and data of Cytochrome C (with the Neutron Spin Echo RESEDA) at the Research Neutron Source Heinz Maier-Leibnitz (FRM II), Munich, Germany - Dr. Robert Georgii and Prof Peter Böni (2007) • Study of surfaces and DNA with an AFM at the Physics Department of the Technical University of Munich, Germany - Prof Thorsten Hugel (2006) • Performance evaluation of an animal PET scanner at the university hospital "Rechts der Isar", Munich, Germany - Prof Sibylle Ziegler (2006) • Data analysis of water levels of the Baltic Sea at the Leibnitz Institute for Baltic Sea Research, Warnemünde, Germany - Dr. Torsten Seifert (2005) 	
EDUCATION	MicroMasters in Statistics and Data Science	2020 - 2021
	Massachusetts Institute of Technology / MITx, Cambridge, MA, USA	
	Ph.D. in Physics	2010 - 2015
	Heidelberg University, Heidelberg, Germany	
	Diploma in Physics	2004 - 2009
	Technical University of Munich, Munich, Germany	
HONORS & AWARDS	Helmsley Fellowship , Helmsley Charitable Trust	2017
	66th Lindau Nobel Laureate Meeting , Participant	2016
	Excellence Award , Max Planck Society	2010
	Oskar Karl Forster Scholarship , Technical University of Munich	2009
	Study Career Scholarship , Technical University of Munich	2008

	"Widening the Lens" Microscopy Education Program (virtual workshop)	
	Lecturer, Vanderbilt University School of Engineering	2022
	Nashville, TN, United States of America	

NIH FAES Imaging - From IF and FISH to Automated and Confocal Microscopy (virtual workshop), Instructor of the Image Analysis Bootcamp, National Institutes of Health, Bethesda, United States of America 2021

Fiji Image Processing and Analysis Workshop (virtual workshop) 2021
Instructor of the Superresolution Data Handling Module, Turku Bioscience Centre, Turku, Finland

NIH FAES Super Resolution Workshop (virtual workshop) 2021 - 2022
Instructor, Foundation for Advanced Education in the Sciences (FAES) Bethesda, United States of America

Fiji Macros Programming (virtual workshop) 2020
Instructor, Janelia Research Campus, Ashburn, United States of America

DECODE for Single Molecule Localization Microscopy (virtual workshop) 2020
at the *From Image to Knowledge with ImageJ & Friends* conference
Instructor, Janelia Research Campus, Ashburn, United States of America

NIH FAES Image Processing and Analysis workshop (virtual workshop) 2019 - 2021
Instructor, National Institutes of Health, Bethesda, United States of America

Open Science in Imaging and Microscopy (breakout session during a workshop) 2019
Instructor, Janelia Research Campus, Ashburn, United States of America

Advanced Imaging Techniques in Biomedical Sciences (summer intern journal club) 2018
Instructor, National Institutes of Health, Bethesda, United States of America

Introduction to microscopy (graduate course) 2017
Teaching assistant, University of Massachusetts Medical School, Worcester, United States of America

Optical Microscopy & Imaging in the Biomedical Sciences (summer intern journal club) 2017
Instructor, National Institutes of Health, Bethesda, United States of America

Advanced physics laboratory course for physics students (undergraduate course) 2011
Teaching assistant, Heidelberg University, Germany

Experimental Physics III: Optics (undergraduate course) 2011
Teaching assistant, University of Göttingen, Germany

Experimental Physics IV: Quantum, atomic and molecular physics (undergraduate course), Teaching assistant, University of Göttingen, Germany 2010

Theoretical Physics I: Theoretical Mechanics (undergraduate course) 2009
Teaching assistant, Technical University of Munich, Germany

Theoretical Physics II: Electrodynamics (undergraduate course) 2008
Teaching assistant, Technical University of Munich, Germany

MENTORING

Mentoring of Ph.D. and master's students 2022 - present
Focus: Navigating an industry career, how to work in an optics laboratory & in-depth support of individual research projects
Carl Zeiss AG, Oberkochen, Germany

Janelia Buddy Program for international scientists 2020 - 2021
Focus: Facilitating the transition of international scientists to Janelia in partnership with Janelia's Human Resource Department
Janelia Research Campus, Ashburn, United States of America

Mentoring of postbac students 2020 - 2021
Focus: Navigating a scientific career
Janelia Research Campus, Ashburn, United States of America

	Mentoring of Ph.D., college, and high school students	2017 - 2018
	Focus: Navigating a scientific career, how to work in an optics laboratory & in-depth support with individual research projects National Institutes of Health, Bethesda, United States of America

**CERTIFICATES &
TRAINING**

Fundamentals of Statistics An 18-week in-depth introduction course by MITx to develop and understand fundamental statistical principles on firm mathematical grounds starting from the construction of estimators and tests, as well as an analysis of their asymptotic performance.	2021
Leadership Principles for Scientists, Engineers, and Researchers A four-month and four-course online program from MIT that empowers engineers, scientists, and researchers with the leadership insight needed to solve problems, innovate, and drive change.	2021

Machine Learning with Python: from Linear Models to Deep Learning	2021
A 15-week in-depth introduction course by MITx to the field of machine learning, from linear models to deep learning and reinforcement learning, through hands-on Python projects.	
Data Analysis for Social Scientists	2020
An 11-week course by MITx to learn methods for harnessing and analyzing data to answer questions of cultural, social, economic, and policy interest.	
Probability - The Science of Uncertainty and Data	2020
A 16-week course by MITx to build foundational knowledge of data science with an introduction to probabilistic models, including random processes and the essential elements of statistical inference.	
Fierce Conversations program	2020
A 6-week course offered by Howard Hughes Medical Institute about Feedback, Confrontation, Team, Delegation, Coaching, and Accountability.	
LabVIEW Core 2	2020
A certificate course offered by National Instruments about the LabVIEW basics.	
LabVIEW Core 1	2020
A certificate course offered by National Instruments about the LabVIEW basics.	
HBS Entrepreneurship Essentials	2020
Entrepreneurship Essentials is a 4-week, 30-hour online certificate program from Harvard Business School. Entrepreneurship Essentials introduces participants to the entrepreneurial journey from finding an idea to gaining traction in the marketplace to raising capital for a venture. Participants learn an overarching framework - People, Opportunity, Context, Deal - to evaluate opportunities to manage start-ups and finance ventures.	
HBS Management Essentials	2019
Management Essentials is an 8-week, 35-hour online certificate program from Harvard Business School. Management Essentials takes a distinctive, hands-on approach to management. Participants in this course learn to identify, understand, design, and shape critical organizational and managerial processes to get the work done.	
HBS CORE (Credential of Readiness)	2019
CORE (Credential of Readiness) is a 150-hour certificate program on business fundamentals from Harvard Business School. The CORE is comprised of three courses - Business Analytics, Economics for Managers, and Financial Accounting - developed by leading Harvard Business School faculty and delivered in an active learning environment based on the HBS signature case-based learning model.	
Scientists Teaching Science	2018
at the Office of Intramural Training and Education (OITE) at the National Institutes of Health, Bethesda, United States of America (9-week online pedagogy course)	
Research Mentor Training	2018
at the Office of Intramural Training and Education (OITE) at the National Institutes of Health, Bethesda, United States of America	
Business of Science for Scientists	2018
by SciPhD at the National Cancer Institute in Shady Grove, United States of America	
Chromatin, Epigenetics and Gene Expression Course	2018
at the Cold Spring Harbor Laboratory (CSHL) in Cold Spring Harbor, NY, United States of America, Course instructors: Prof Karen Adelman, Dr Luciano Di Croce, Prof Geeta Narlikar, Prof Ali Shilatifard	

	BioTech2: Recombinant DNA Methodology at the Foundation for Advanced Education in the Sciences at the NIH (FAES), Bethesda, United States of America	2017
